the transcendental machine trilogy in one volume like many trilogies the transcendental trilogy may best be viewed as one continuous story so here they are riley a veteran of interstellar war is one of many beings from many different worlds aboard a ship on a pilgrimage that spans the galaxy however he is not journeying to achieve transcendence a vague mystical concept that has drawn everyone else on the ship to this journey into the unknown at the far edge of the galaxy his mission is to find and kill the prophet who is reputed to help others transcend while their ship speeds through space the voyage is marred by violence and betrayal making it clear that some of the ship s passengers are not the spiritual seekers they claim to be like the pilgrims in chaucer s canterbury tales a number of those on the starship share their unique stories but as tensions rise riley realizes that the ship is less like the canterbury tales and more like a harrowing deadly ship of fools when he becomes friendly with a mysterious passenger named asha he thinks she s someone he can trust however like so many others on the ship asha is more than she appears uncovering her secrets could be the key to riley s personal quest or make him question everything he thought he knew about transcendentalism and his mission to stop it

the essays collected in this volume and authored by sami pihlström emphasize that our relation to the world we live in and seek to represent and get to know better through our practices of conceptualization and inquiry is irreducibly valuational there is no way of even approaching let alone resolving the philosophical issue of realism without drawing due attention to the ways in which human values are inextricably entangled with even the most purely factual projects of inquiry we engage in this entanglement of the factual and the normative is as explicitly argued in chapter 7 but implicitly suggested in all the other chapters as well both pragmatic practice embedded and practice involving and transcendental operating at the level of the necessary conditions for the possibility of our representing and cognizing the world in general the author claims we need to carefully examine the complex relations of realism value and transcendental arguments at the intersection of pragmatism and analytic philosophy this book does so by offering case studies of various important neopragmatists and philosophers close to the pragmatist tradition including hilary putnam nicholas rescher joseph margolis and ludwig wittgenstein it appeals to scholars and advanced graduate students focusing on pragmatism and analytic philosophy
