unit i the foundations introduction to multicultural health theories and models related to multicultural health worldview and health decisions complementary and alternative medicine religion rituals and health communication and health promotion in diverse societies unit ii specific cultural groups hispanic and latino american populations american indian and alaskan native populations african american populations asian american populations european and mediterranean american populations nonethnic cultures unit iii looking ahead closing the gap strategies for eliminating health disparities

essentials of international health provides an introduction to international health with a focus on epidemiological political behavioral sociological cultural and medical dimensions in the field the text covers problems concerning both developed and developing countries with an emphasis on developing countries and introduces population based public health approaches to solving international health problems topics include historical perspectives health indicators role of culture and behavior communicable diseases non communicable diseases malnutrition nutritional deficiencies and obesity environmental health and population issues health of women health of children mental health world health systems and future issues in international health this text is ideal for undergraduate students introductory graduate classes and practitioners interested in working in developing countries

the goal of this open access book is to develop an approach to clinical health care ethics that is more accessible to and usable by health professionals than the now dominant approaches that focus for example on the application of ethical principles the book elaborates the view that health professionals have the emotional and intellectual resources to discuss and address ethical issues in clinical health care without needing to rely on the expertise of bioethicists the early chapters review the history of bioethics and explain how academics from outside health care came to dominate the field of health care ethics both in professional schools and in clinical health care the middle chapters elaborate a series of concepts drawn from philosophy and the social sciences that set the stage for developing a framework that builds upon the individual moral experience of health professionals that explains the discontinuities between the demands of bioethics and the experience and perceptions of health professionals and that enables the articulation of a full theory of clinical ethics with clinicians themselves as the foundation

against that background the first of three chapters on professional education presents a general framework for teaching clinical ethics the second discusses how to integrate ethics into formal health care curricula and the third addresses the opportunities for teaching available in clinical settings the final chapter empowering clinicians brings together the various dimensions of the argument and anticipates potential questions about the framework developed in earlier chapters

this is a rare compilation of clinically focused chapters on the practice of oncology in more than 25 countries and areas around the world that experience ongoing or intensifying ethnic religious and nationalistic conflict each chapter is written by an internationally respected local physician or nurse topics include the relationship between local culture and the local practice of mainstream modern medicine critical clinical issues faced by local physicians and options for when and how to incorporate palliative care the book ends with chapters on the united states current initiatives on promoting cancer care training in these regions and another on clinical concepts for western clinicians undertaking oncology practice in emerging countries the audience includes oncologists around the world those practicing medicine in similarly extreme circumstances western oncologists organizing or preparing for medical missions and western oncologists who wish to learn from the experiences of oncologists who practice under radically different conditions

in psychiatry as in all of medicine clinicians are frequently involved in training students and residents yet few have themselves been trained in pedagogy improving the quality of psychiatric education should both improve the quality of psychiatric care and make the profession more attractive to medical students written by a team of international experts with many years of experience this comprehensive text takes a globally relevant perspective on providing practical instruction and advice on all aspects of teaching psychiatry it covers learning from undergraduate and postgraduate level to primary medical and community settings enabling readers to find solutions to the problems they are facing and become aware of potential issues which they can anticipate and be prepared to address the book discusses curriculum development using examples from around the world in order to provide trainees with the basic attitudes knowledge and skills they require to practise psychiatry features instruction on developing a curriculum

for residency training teaching interviewing skills teaching psychotherapy and using new technology innovative ways of engaging medical students in psychiatry and developing their interest in the specialty including experience with new types of elective and research options and development of roles for students in patient care focuses throughout on how to teach rather than what to teach includes descriptions of workplace based assessments discussions of both theoretical and practical perspectives and examples of particular innovations in the field using case studies presented in a thoroughly readable and accessible manner this book is a primary resource for all clinicians involved in teaching psychiatry to medical students and trainees

effective approaches to global health issues is a comprehensive interdisciplinary book that explores diverse topics in global health it serves as a valuable resource for understanding the complexities and challenges associated with global health from various perspectives the book delves into historical contexts health indicators cultural influences behavioral factors communicable and non communicable diseases malnutrition nutritional deficiencies obesity environmental health population issues women s and children s health mental well being global health systems and emerging issues in the field it goes beyond a mere recitation of topics and provides an engaging narrative that examines the interconnectedness of global health issues this is an essential reference for students researchers and professionals involved in public health international development and related disciplines by providing a comprehensive understanding of global health issues and potential solutions this book equips readers with the knowledge and tools to address the complex challenges of global health in their respective fields presents interdisciplinary perspectives on global health problems and solutions highlights the epidemiological historical political sociological behavioral cultural and medical dimensions provides readers with a roadmap to address issues and problems confronting both developed and developing nations

reflecting the increasing interest in fertility management for pediatric and adolescent patients and fulfilling an urgent need to have a comprehensive guide to the management of these individuals this is the first book of its kind to present a comprehensive discussion of pediatric and adolescent oncofertility it carefully examines the impact of pediatric cancer and cancer therapy on fertility and presents both current and emerging

fertility preservation techniques for both males and females such as cryopreservation fertility concerns beyond cancer are also discussed including disorders of sexual differentiation gender dysphoria and thalassemia practical chapters on pediatric oncofertility in the clinic round out the book covering setting up a practice counseling and consent disclosure and insurance considerations concluding chapters document fertility preservation techniques and outcomes internationally with contributions from portuguese brazilian and japanese authors timely and wide ranging pediatric and adolescent oncofertility is an ideal resource for reproductive medicine specialists pediatric oncologists and primary care physicians treating pediatric and adolescent cancer patients looking to protect fertility options

the covid 19 pandemic has led to increased strain and mental health problems due to changing working conditions given the existential nature of the pandemic it remains crucial to establish employee effectiveness resilience and agility and to particularly understand the long term psychological impact the pandemic might have on workplaces it is essential to recognize how workplaces cope with work from home challenges and hybrid working beyond the crises building a narrative in our understanding of the psychological cognitive and physical experiences and responses of workplaces is critical it provides the opportunity to help craft the way forward for organizations and employees

there has been a remarkable amount of popular and professional interest in the relationship between spirituality religion psychology and health in recent years this book begins with the importance of a critical methodology when studying the relationship between religion and psychology among the many topics presented is a study on the experience of contemporary peacekeepers faced with existential questions about life death being and the searching for meaning other chapters explore the relationship of holistic healing and personal development recovery from trauma and spirituality spirituality and a woman s ability to deal with infertility and the relationship between a person s health and their ability to forgive

this book presents the latest research in health translation resource development and evaluation advances in community and professional health interpreting and the communication of health risks to multicultural populations this advanced resource will be helpful for research students and academics of translation and interpreting studies
